

Here's proof that I've applied to 25 internships.

The companies are:

BAE Systems
Battelle
Burns & McDonald
General Motors
W. L. Gore
Gulfstream (General Dynamics)
Hatzel & Buehler
Howmet Aerospace
Impulse Space
Legence
Lockheed Martin
Lutron
Mortenson
Motorola
Naval Nuclear Laboratory
Nexus Engineering
Northrop Grumman
Qnity
Raytheon (RTX)
Sargent & Lundy
SRT
Stanley Black & Decker
Stellantis
The Aerospace Corporation
The Toro Company

The next page is my resume, I tailored it to each job but this one is my latest version.

Josh Steckel

jpsteckel@icloud.com | 484-506-5950 | jpsteckel.github.io/portfolio/

EDUCATION

University of Delaware

Expected May 2029

Bachelor of Engineering in Electrical Engineering | GPA: 3.99

EXPERIENCE

Ground Station Team Lead

May 2026 – Present

Delaware Atmospheric Plasma Probe Experiment (DAPPER)

- Led a 4-member subteam designing, integrating, and upgrading ground station electrical support equipment and RF cabling for a student-built Low-Earth Orbit (LEO) CubeSat mission
- Developed and tested channel models in MATLAB to simulate and optimize downlink data transmission rates, validating RF signal paths and achieving 359 kB/day throughput at a 12 dB link margin
- Evaluated and wrote documentation for link budgets for NASA's CubeSat Launch Initiative Pre-Procurement Readiness Review (PPRR) and FCC licensing

PROJECTS

Altoids Tin Meshtastic Node | PCB Design, Schematic Capture, SMD Soldering, Hardware Debug, C++

- Designed and assembled a 55 × 75 mm, 2-layer 915 MHz PCB; performed schematic capture, component specification, manual SMD soldering, and CPWG impedance-controlled routing in KiCad
- Integrated battery charging/regulation circuitry and OLED display; conducted functional bench testing, oscilloscope signal probing, and firmware debug, achieving 30-hour battery runtime

Fault Injection on Cryptographic Hardware | Hardware Security, ChipWhisperer, Embedded Systems, ARM

- Conduct hardware fault-injection experiments with ChipWhisperer to induce instruction skips on ARM Cortex microcontrollers executing post-quantum cryptographic algorithms
- Characterize device responses using oscilloscopes to tune transient voltage and clock glitch parameters, documenting reliable fault-injection windows and failure modes

Power Side-Channel Analysis Research | Signal Processing, Test Data Collection, Machine Learning, Python

- Collected and analyzed 60+ hours of high-frequency hardware power consumption data, applying Short Time Fourier Transform (STFT) spectral analysis and CNNs to classify device operational states with 97% accuracy

Folded Dipole Antenna Design & RF Hardware | RF Engineering, Antenna Design, Impedance Matching, NanoVNA

- Applied electromagnetic theory to calculate, fabricate, and install a 145 MHz four-element folded dipole antenna and coaxial harness, restoring the Amateur Radio Club's repeater system
- Conducted S-parameter measurements and VSWR tuning using a Vector Network Analyzer (NanoVNA) to match feedline impedance to coaxial transmission line, optimizing RF radiation efficiency

University Transit System Departure Board | Embedded Systems, Firmware, FreeRTOS, ESP32, AWS, C++

- Engineered a compact electromechanical transit arrival display, interfacing an ESP32 microcontroller and OLED screen with an automated serverless scraper pipeline hosted on AWS Lambda
- Implemented multi-core FreeRTOS firmware to process JSON payloads over secure HTTPS, reducing active microcontroller execution time by 75% while driving a horizontal marquee display

SKILLS

Core Skills: PCB Layout & Schematic Capture, Circuit Simulation, Soldering, Wire Harnessing, Hardware Debug, Embedded Systems

Lab Equipment: Oscilloscopes, Digital Multimeters (DMM), Function Generators, Spectrum Analyzers, VNA, DC Power Supplies

Programming Languages: C, C++, Python, MATLAB, Verilog, VHDL

Software & Tools: KiCad, LTspice, Vivado, GNU Radio, SolidWorks, Microsoft Office (Excel, Word, PowerPoint), Git

ACTIVITIES, LEADERSHIP & CERTIFICATIONS

- Amateur Radio Club — Treasurer
 - Manage component procurement, bill of materials (BOM) budgets, and financial records for electrical hardware
- FCC Amateur Radio License — Technician Class (KD3DKR)

To: jpsteckel@icloud.com

Dear Joshua ,

Thanks for applying to GM, where we are working to make our world better, safer and more equitable for all.

We appreciate your interest and will review your application promptly.

If you are applying to a role that requires coding skills, you may receive an invitation to take a coding assessment. You will receive a separate email within 24 hours (make sure to check your SPAM folder) providing further instructions to complete the coding assessment.

Once your initial application and assessment results (if applicable) have been reviewed, you will receive an update on whether you have been selected to move forward in the hiring process and a member of the Early Career Talent team will contact you about next steps.

At any time, you may log into your Workday account with your username and password to review your candidate profile and application status. And while you're there, be sure to check out other roles that may be a good fit for you.

Learn how GM's vision of zero crashes, zero emissions and zero congestion is built through innovators who are striving to create a better tomorrow on [GM career site](#) .

Job Description

INTERNSHIP FORMAT

This internship will follow an in-person model. Interns will be based at the Stellantis Headquarters and Technology Center in Auburn Hills, Michigan, and are expected to work on-site 5 days per week, depending on business needs. Relocation assistance may be available for candidates who meet specific eligibility criteria. The internship program is scheduled to run from May through August 2027.

STELLANTIS INTERNSHIP PROGRAM HIGHLIGHTS

The Stellantis Internship Program offers a unique opportunity for highly motivated, innovative, and inspired individuals to work on challenging assignments where contribution, teamwork and communication are vital to the success of the organization. As a leading-edge company, we provide real world challenges and rewarding intern experiences to candidates from a variety of colleges and universities while providing a competitive salary.

Interns will be assigned to a department based on the candidate's background and skill set. The assignments are project-oriented, meaningful to the department and allow the intern to provide valuable contributions. Interns experience a sense of personal accomplishment and learn about the corporate business culture through work assignments, structured activities, and exclusive intern networking events. Interns that demonstrate outstanding qualities may be invited back for a return internship the following summer or may be considered for full-time positions.

Internship Benefits:

- Exposure to cutting-edge projects and technologies
- Collaborative work environment
- Mentorship from experienced professionals
- Networking opportunities with peers and leaders
- Skill development workshops and training sessions
- Paid US holidays
- Stellantis Employee Advantage Vehicle Discount Program
- Eligible interns may be able to participate in the Company Vehicle Employee Lease Program

DEPARTMENT DETAILS

Join Stellantis Product Development & Technology (PDT) as an Electrical, Electronic and Hardware Engineering Intern.

As an intern within the Electrical, Electronic and Hardware Engineering team, you may work within one of the following areas:

- Harness and Distribution
- Validation and Industrialization
- Program Management

- Hardware Engineering
- Quality
- Electrical Architecture & Validation

You will receive an opportunity to acquire valuable skills that will boost your future career potential, and you will gain hands-on experience working among technology leaders and fellow interns and will deliver technical solutions aligned with our software strategy. You will have the opportunity to present and share your project to our Product Development & Technology Senior Leadership team. The goal of our PDT internship program is to create a pool of experienced candidates that can be considered for permanent positions in our organization who will contribute to our purpose: powered by our diversity, we lead the way the world moves.

If you share a love for cars and technology and want to be a part of something great, Stellantis is your home. Join a company that is customer centric, celebrates winning together, is agile, innovative, and cares for the future.

What to expect:

- A real assignment project, with deliverables that matter!
- Exposure to approachable, fun, and intelligent people who can make great things happen.
- A knowledgeable coach to help facilitate learning, growth, and network development
- Experiences that build company acumen and individual technical skills
- You will have learned how to communicate progress updates and results to stakeholders and Senior Leaders
